

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 22, 2010

Water Body Under Evaluation:

Water Body ID #: 1855
Name: Lick Creek (Class C)
Length of Segment: 2.5 miles
County (ies): Crawford

Use Attainability Analysis (UAA) Study:

UAA ID #: 1277
Submitter: Olsson Associates
Date(s) Conducted: August 11, 2008, revised December 3, 2008
Date Received: October 14, 2008, revised December 9, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2008 and revised in December 2008 due to one of the sites monitored not being on the correct segment. At the time of both surveys there was no WBCR observed. It was noted in the August 2008 study that a 0.8 meter deep pool was just downstream of site #1 and there were footprints present at or near the stream bank. During the December 2008 study the creek was dry. No interviews were conducted during this survey.

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the maximum or median depth criteria for WBCR during either survey. No interviews were taken in the 2008 UAA study. Due to the lack of depth, but some signs of secondary usage, the committee recommends that WBCR be removed and SCR be added.

Committee Recommendation: ☐ Add Use ☐ Retain Use ☒ Remove Use
☐ Modify Use ☐ Inconclusive
